

Keva Cow Colostrum

What is Cow Colostrum?

Colostrum is a milky fluid that comes from the udder of cows the first few days after giving birth, before true milk appears.

This fluid contains proteins called antibodies. These antibodies may fight bacteria and viruses that cause diseases.

Antibody levels in bovine colostrum can be 100 times higher than levels in regular cow's milk.

Highly Nutritious

Cow colostrum contains macronutrients, vitamins, and minerals. It's especially high in protein compounds that regulate immune responses and promote growth, including lactoferrin, growth factors, and antibodies.

Health Benefits of cow colostrum

**May Boost
Immunity**

**May
Prevent
and Treat
Diarrhea**
