

KEVA

# KEVA KIDNEY CARE

**Healthy kidneys filter about a half cup of blood every minute, removing wastes and extra water to make urine**

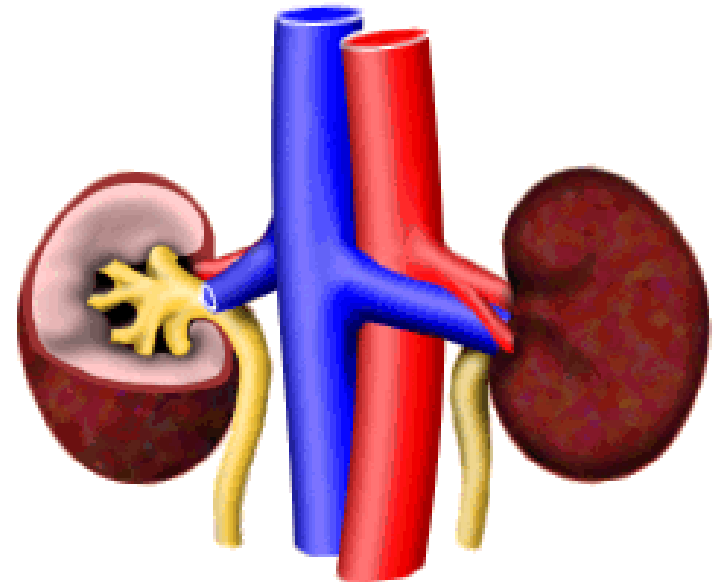

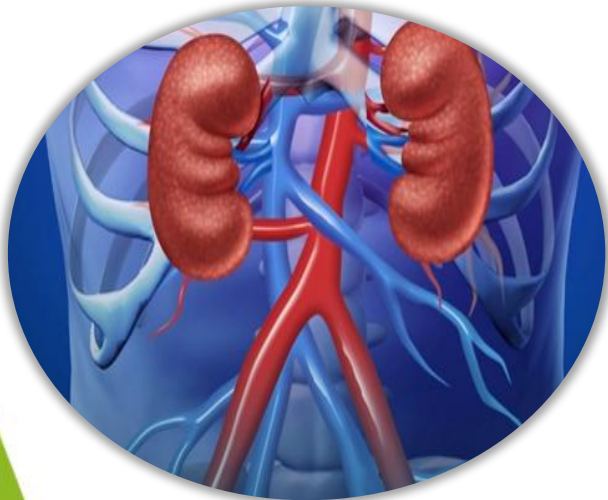

**Your kidneys remove wastes and extra fluid from your body. Your kidneys also remove acid that is produced by the cells of your body and maintain a healthy balance of water, salts, and minerals—such as sodium, calcium, phosphorus, and potassium—in your blood.**

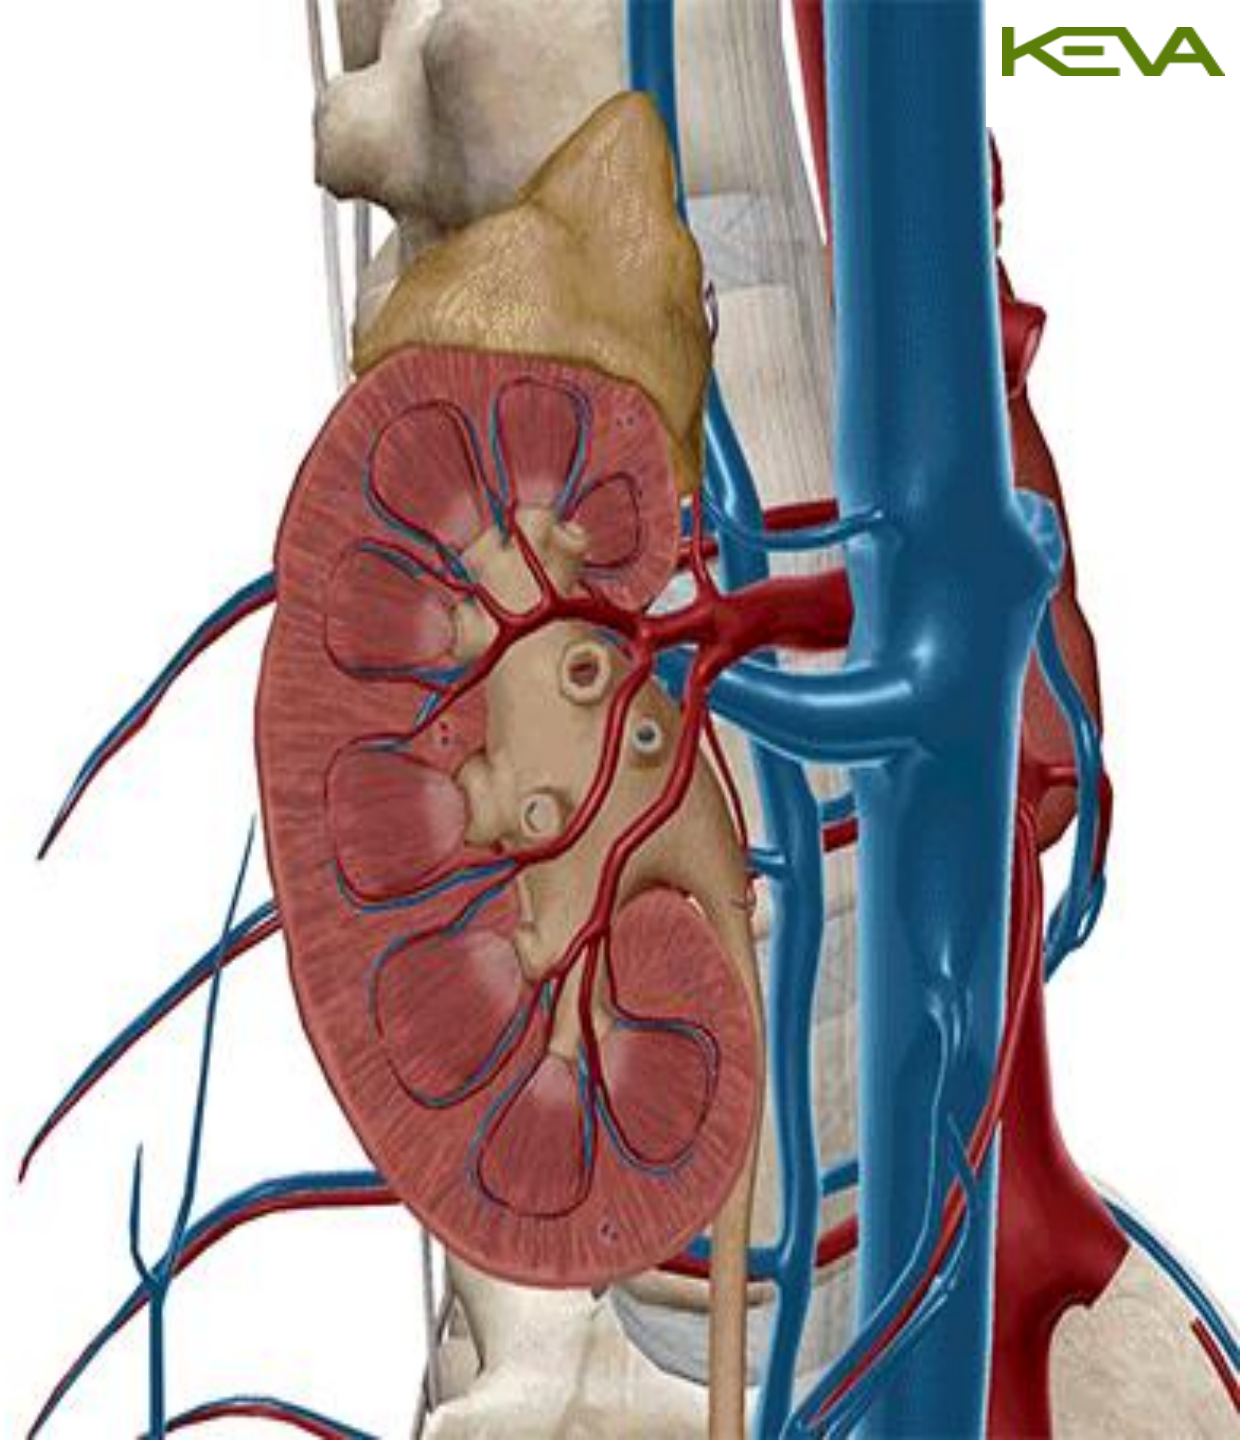

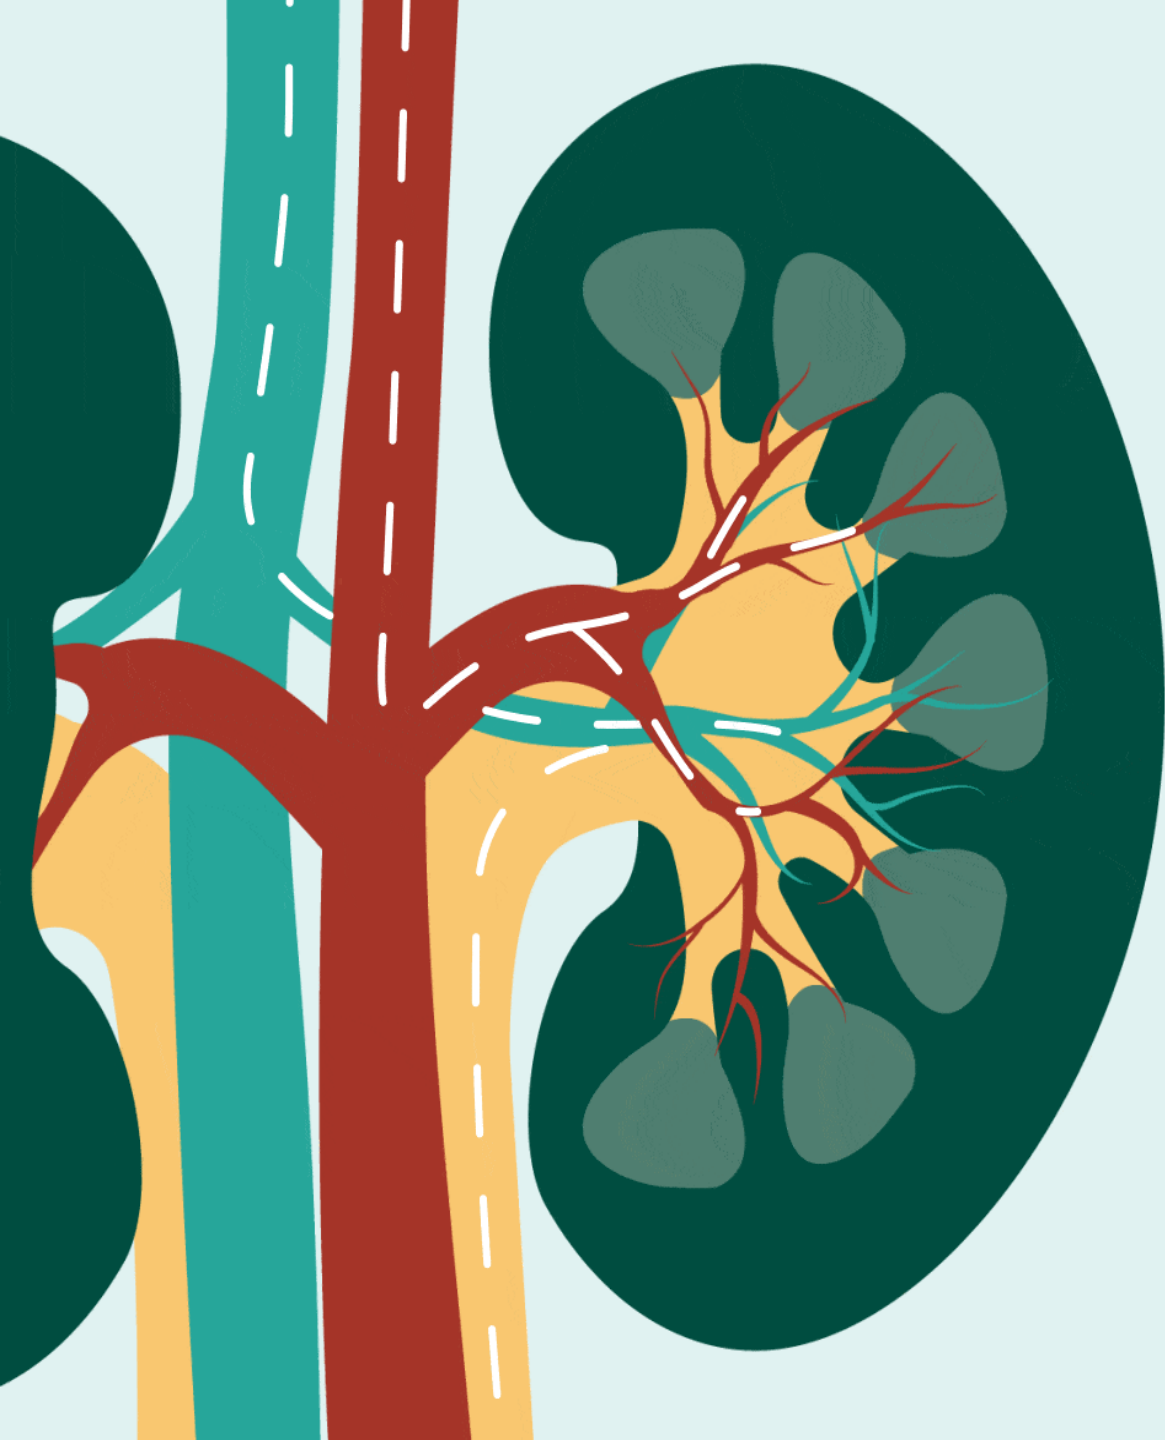

**Without this balance, nerves,  
muscles, and other tissues in  
your body may not work  
normally**

**Your kidneys also make hormones that help**

- **control your blood pressure**
- **make red blood cells**
- **keep your bones strong and healthy**

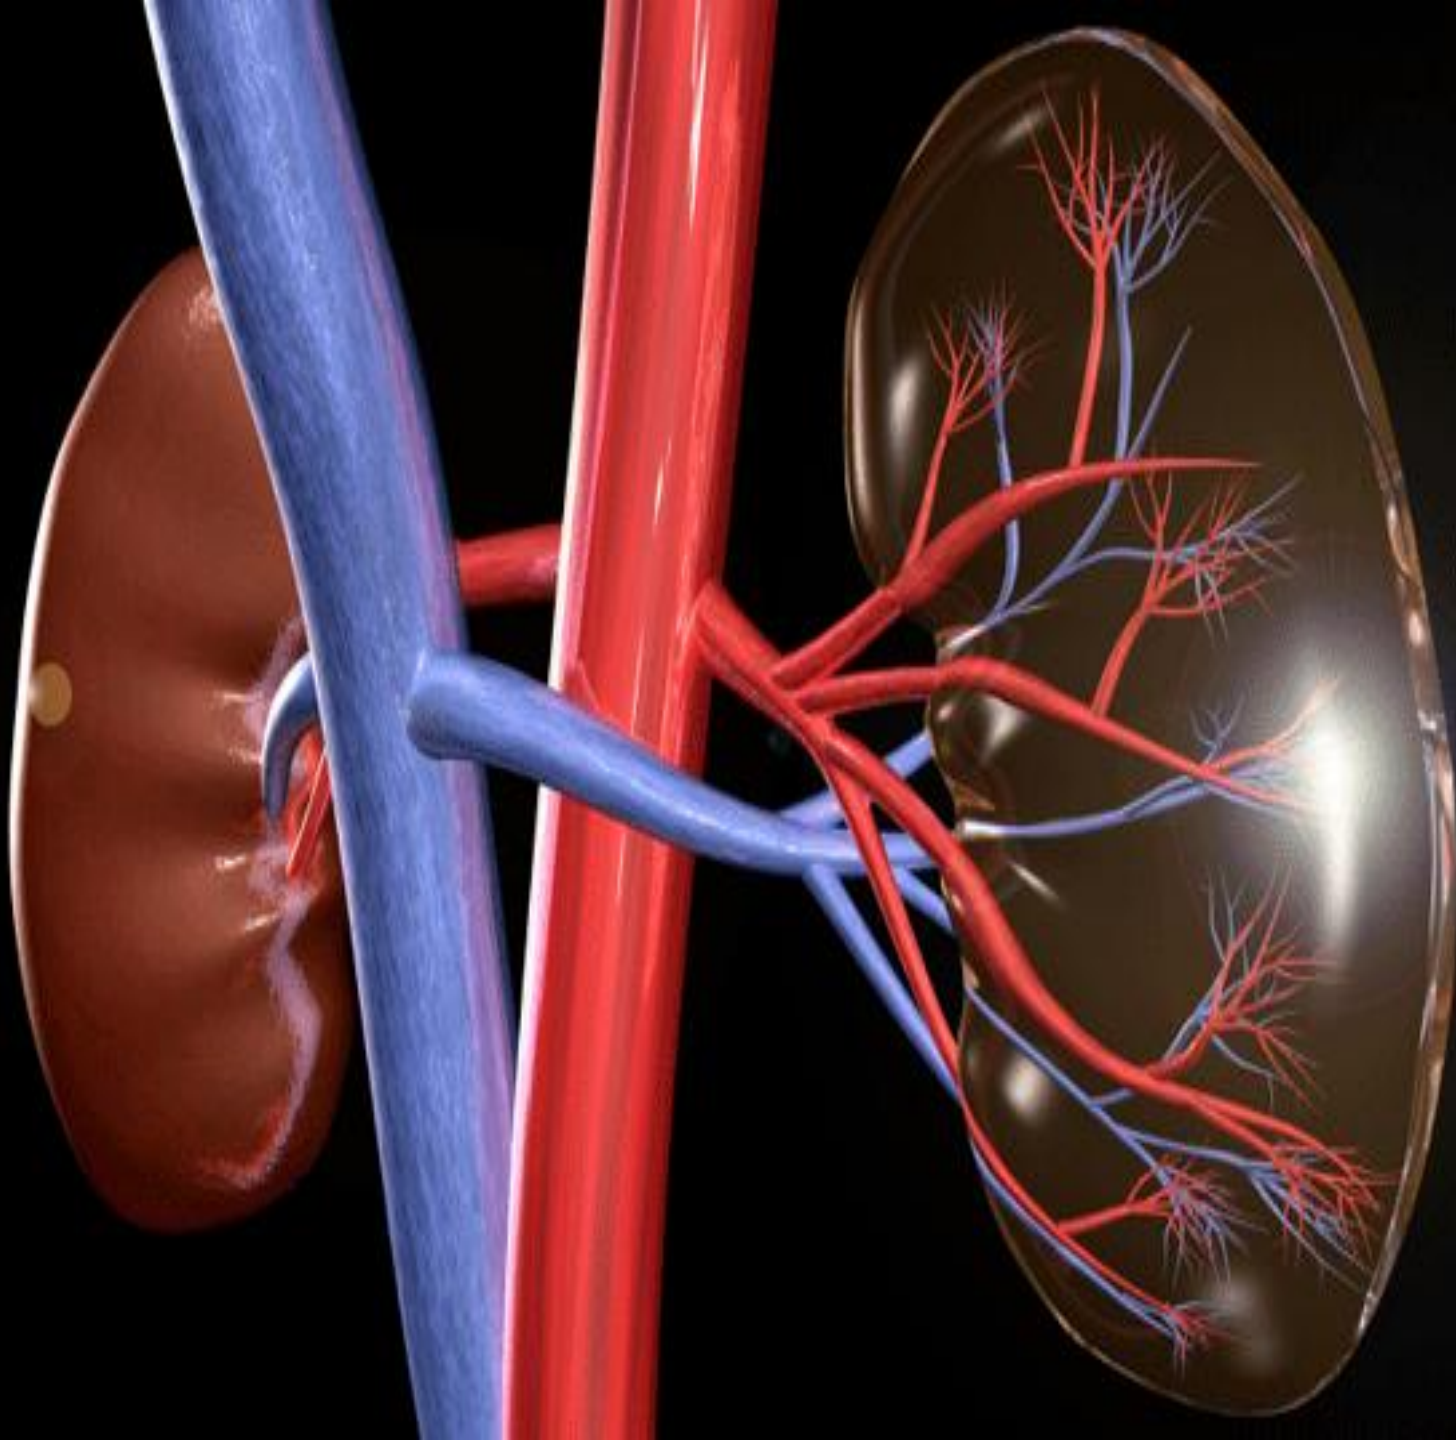

**Kidney failure occurs when your kidneys lose the ability to sufficiently filter waste from your blood. Many factors can interfere with your kidney health and function, such as:**

- toxic exposure to environmental pollutants or certain medications**
- certain acute and chronic diseases**
- severe dehydration**
- kidney trauma**

**Your body becomes overloaded with toxins if your kidneys can't do their regular job. This can lead to kidney failure, which can be life-threatening if left untreated.**

# SYMPTOMS OF KIDNEY FAILURE KEVA

Usually someone with kidney failure will have a few symptoms of the disease. Sometimes no symptoms are present. Possible symptoms include:

- a reduced amount of urine
- swelling of your legs, ankles, and feet from retention of fluids caused by the failure of the kidneys to eliminate water waste
- unexplained shortness of breath
- excessive drowsiness or fatigue
- persistent nausea
- confusion
- pain or pressure in your chest
- seizures
- coma

**KEVA**

# Keva Kidney Care

KEVA

Helps you in maintaining healthy kidneys which is very essential to good health. Tiny units in the kidneys called nephrons act as filters and facilitate a complicated chemical exchange as waste and water leave the blood. In the nephrons a minute blood vessel or capillary called a glomerulus intertwines with a tiny urine-collecting tubule

# Keva Kidney Care

KEVA

These help the kidney measure out and release back into the blood stream essential chemicals like phosphorus, potassium, and sodium. In this way, the kidneys regulate and balance the body's levels of these substances, which is necessary for the overall healthy function of the entire system

# Keva Kidney Care

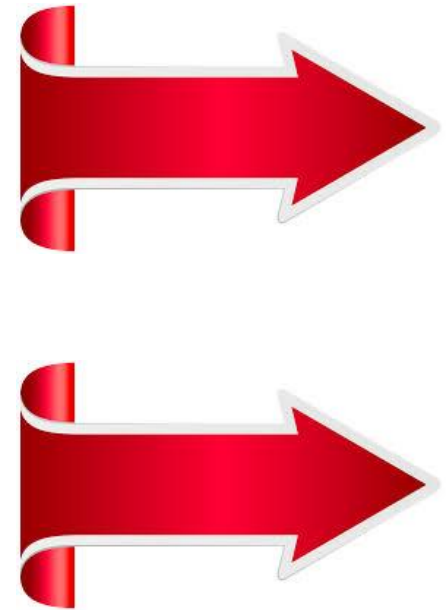

KEVA

**Keva Kidney Care helps you to normalize the overall activity of Kidney, avoiding precipitation of minerals in Kidney generally major cause of stone formation in Kidney and keep your body free from harmful toxins**

But with Keva Kidney Care you can maintain your natural health of this vital organ. Keva Kidney Care is unique blend of herbs which are known to contain various therapeutic properties:**

# WHAT KEVA KIDNEY CARE CONTAINS

- **Phyllanthus Niruri**
- **Arctostaphylos Uva-Ursi**
- **Gynostemma Pentaphyllum Extract**
- **Orthosiphon Stamineus**
- **Dolichos Biflorus**
- **Citrus Limonum**
- **Raphanus Sativus**
- **Alhagi Camelorum**
- **Ammonium Chloride, Nitrates & Potash Alum**
- **Mimosa Pudica**

# Phyllanthus Niruri

This herb has been taken from Brazil and has been shown to interfere with many stages of stone formation, reducing crystals aggregation, modifying their structure and composition as well as altering the interaction of the crystals with tubular cells leading to reduced subsequent endocytosis. The clinical beneficial effects of Phyllanthus Niruri may be related to urethral relaxation, helping to eliminate calculi or to clear fragments following lithotripsy, or also to a putative reduction of the excretion of urinary crystallization promoters such as calcium

# Arctostaphylos Uva-Ursi

This herb has been taken from very prominent place Egypt and is known to reduce accumulations of uric acid and relieve the pain of bladder stones. It has been widely used as a diuretic, astringent, and antiseptic so protect us various kidney & urinary tract infections. In chronic affections of the kidneys and urinary passages, it is frequently useful herb.

# Gynostemma Pentaphyllum Extract

This is taken from very particular place China where they call this Jiaogulan. It is best known as an herbal medicine reputed to have powerful antioxidant and adaptogenic effects purported to increase longevity. It helps to improve kidney stones, gallstones and urethral stones. Long term consumption can nourish the Kidney and liver, reduce body heat, detoxify the body and maintain good health

# Orthosiphon Stamineus

This herb is specially taken from Japan known to enhance the health of the urinary system. Orthosiphon Stamineus is a popular traditional botanical extensively used in Southeast Asia for a wide range of conditions including renal calculus (kidney stones), gallstones, edema, eruptive fever, hepatitis, and jaundice. In Japan, it is consumed as a healthy tea to facilitate body detoxification. Kidney stones can also be caused by disordered uric acid metabolism.

# Dolichos Biflorus

This is specially taken from its very prominent place Sri Lanka. The herb is shown to be effective in dissolving kidney stones; many physicians are nowadays using Horse-gram's seeds in Kidney, bladder and gall stones. More than 80% cases of kidney stones shown to got improved.

# Citrus Limonum

This is taken from China and known to have very good results in Kidney disorder. This medicinal plant, its fruit is recommended in cases of gallstones or kidney problems, nephritis, lack of vitamin C, pyorrhea, vermifuge, antispasmodic, colds, indigestion, cough, flu and respiratory infections, anemia, and rickets.

# Raphanus Sativus

This herb is specially taken from China. Raphanus Sativus is known for its Antiurolithiatic and diuretic activity. The extract shown significant decrease in the weight of stones and increase in the 24 hour urine volume as compared to the control. The observed diuretic activity seems effective in preventing the deposition of crystals.

# Alhagi Camelorum

This herb is taken from Russia where it is widely grown under strict measures to maintain the quality. This herb is known to contain diuretic properties. Shows marked improvement in symptoms of Urinary calculi and UTI's (Urinary Tract Infections) like pain, burning micturition & haematuria.

# Ammonium Chloride, Nitrates & Potash Alum

They help in acidifying the stones and breaks down in small pieces so they can be removed from Urine easily. Nowadays so many scientists are recommending using them. They promote great urethral relaxation, facilitating passage of stones. They can be used to treat the urinary problems & infections.

# Mimosa Pudica

This herb is specially brought from its very native place America. This herb is used as a significant hypolipidemic agent. A decoction of the root of this plant is considered useful in gravel and other urinary complaints. This plant helps to eliminate kidney stones or kidney disorder. This helps in reducing the crystallization of dissolved minerals which causes Stones.

# KEY BENEFITS OF KEVA KIDNEY CARE

- **Limit the work load on the kidney:** The kidney eliminates the harmful, waste ingredients from the blood as well as expels it out from the body through the pee. In the course of your day, the entire blood in the body gets strained more than 20-25 times. For this reason, it's crucial that you decrease the amount of work on the kidney. Keva Kidney Care helps you to remove harmful toxins from body.

# KEY BENEFITS OF KEVA KIDNEY CARE

- Breaks down stone in the bladder and helps in removing stones out of body through urine
- Promotes flow of urine
- Inhibits formation of phosphate & calcium precipitates
- Helpful in severe pain of Kidney & Urethra
- Cures all types of urinary tract infections and other urinary problems
- Relieves inflammation of urethra and burning micturition
- Detoxifies, Purifies & Rejuvenates
