

KEVA

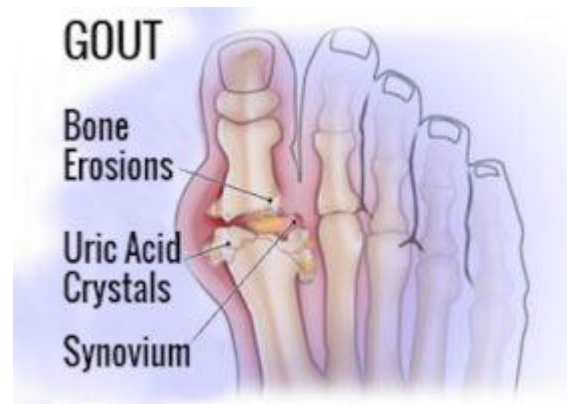

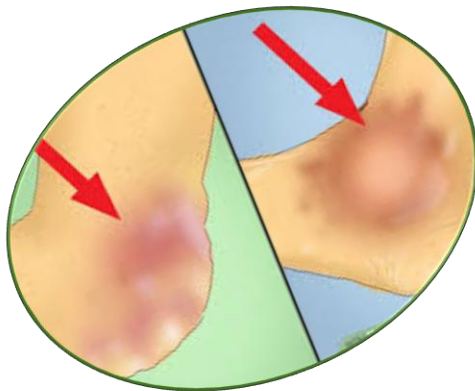

KEVA URIC ACID CONTROL SYRUP

Helps to balance the
level of uric acid

URIC ACID

Uric acid is a waste product created by the body when it breaks down purines. Although it is naturally present in small amounts, excessively high levels of uric acid can lead to gout, a painful condition involving inflammation in one or more joints.

URIC ACID

Normal values of blood uric acid

Women - 2.5 to 7.5 (mg/dL)

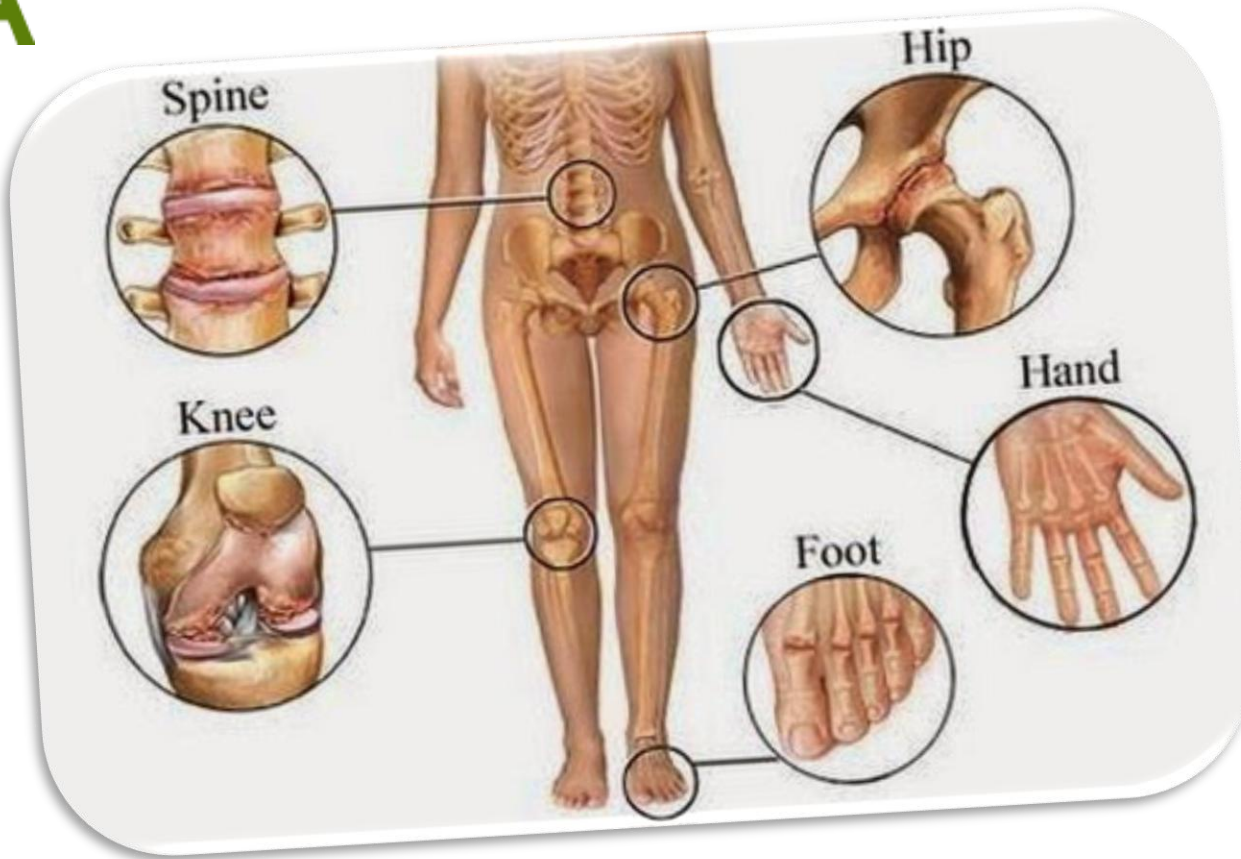

Men - 4.0 to 8.5 (mg/dL)

To help you maintain normal
levels of Blood Uric Acid

KEVA

KEVA URIC ACID
CONTROL SYRUP

Helps properly metabolize uric acid levels and promotes healthy kidney function for optimum health & wellness
