

# KEVA ANIMAL CALCIUM

# ROLE OF CALCIUM IN ANIMALS

Calcium plays a major role in the absorption of nutrients (modification of the cell permeability), as well as in blood clotting.

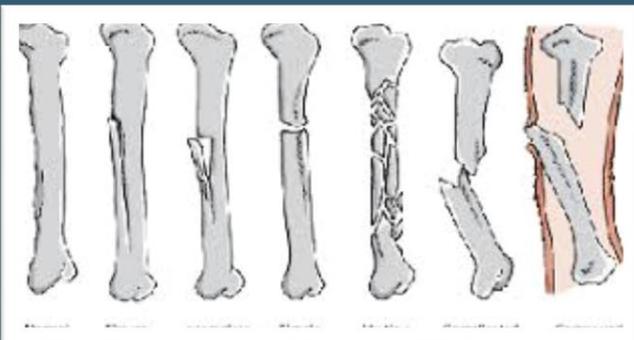

It is a key mineral for egg-shell formation in poultry laying flocks.

Calcium helps cattle to grow strongly by encouraging good bone development.

# RISKS DUE TO A LACK OF CALCIUM

Skeletal and  
bone  
problems

Reduced  
appetite

Increased  
sensitivity to  
parasitic  
diseases

# TO FULFILL DAILY REQUIREMENT OF CALCIUM IN YOUR LIVESTOCK ANIMALS

Keva Industries has brought

**Keva Animal  
Calcium**

# KEVA ANIMAL CALCIUM
