 - Ginger
 - Licorice root

Vitex agnus-castus **(Chastle berry)**

Vitex agnus-castus is a popular herbal supplement used to treat a variety of health problems. It's most commonly used against premenstrual syndrome (PMS), menstrual disorders, infertility, acne, menopause and nursing difficulties. It has Phyto Estrogenic effect which maintains women's hormonal balance & also improves calcium absorption

Dong Quai

Also known as “female ginseng”. It has been used for centuries in traditional medicine to treat a wide range of female complaints including; amenorrhoea (absent periods), cramps and dysmenorrhoea (painful periods), menopausal symptoms, infertility, osteoporosis and anaemia.

Black Cohosh

Black cohosh (*Cimicifuga racemosa*) is a plant commonly used in herbal medicine for the relief of menopausal symptoms. Black cohosh is sometimes touted as a natural alternative to hormone replacement therapy. It is used as a natural remedy for a number of menopause-related symptoms, including hot flashes, night sweats, disturbances in mood, and vaginal dryness.

Ginger

Many clinical studies suggest that Ginger may decrease and even reverse the growth of ovarian cancer cells. During has also been suggested to decrease the side effects of menstruation such as cramps, bloating, sickness, and migraines. Ginger can even help with severe headaches during sickness

Licorice root

Licorice has antibacterial properties and has been found to help relieve stomach ulcers

Licorice is a useful cough remedy; it acts as an expectorant, helping to loosen and expel phlegm

Licorice root is beneficial for digestion and helps soothe irritation and inflammation of your digestive tract
