**KEVA**

**With Organic  
Manure  
Granules**

KEVA

# BENEFITS

**KEVA**

**Soil disturbed due to introduction of chemical fertilizers begin to improvise**

**Leaves become bigger in size and more in number**

**Crop, fruits and flowers improves on performance with satisfactory growth**

✓ **Leaves become dark green and with increased rate of photosynthesis, plant is well fed with necessary ingredients and in turn increases production**

✓ **Develops multiple root structures**

✓ **Consistent rate in shape, size and weight of the produce with improved color and taste- increases product demand and fetches better price**

✓ **Due to improvement in the soil and healthy soil conditions, fungi, insects and crawling pest gets controlled and vanishes gradually day after day**

✓ **Improved soil results with the useful bacterial growth which helps in arresting fungal growth**

# KEVA

➤ Once the soil is relieved of fungal growth the pest and insects reduce without additional efforts. The improvement and conservation of soil needs a period of 5 years. As the soil improves, plant obtains its food supplements from soil itself and hence additional need of fertilizers be, color of come less- the day after day

➤ By using Keva Agro Booster the size, color of the farm product improves, increased product density results in higher crop yield per acre

# KEVA
