

# Keva Stem Cell Plus

KEVA

**KEVA**

**Keva Stem Cell Plus is formulated to rejuvenate your body and slow the aging process to help you feel and function more like a young person. This can help you feel better, look younger and improve your health**

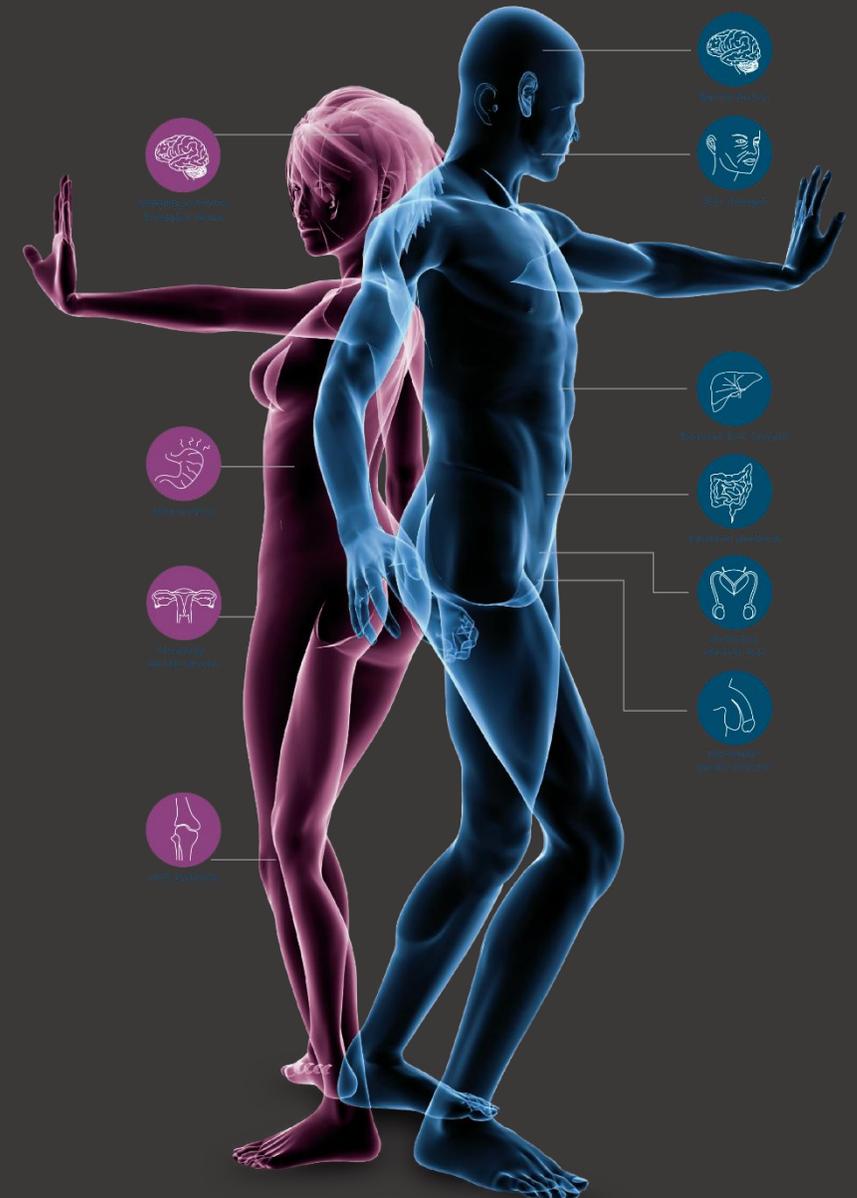

**This supplement provides key fundamentals by activating one's own adult stem cells naturally that are scientifically proven to be the very essence of life and good health.**

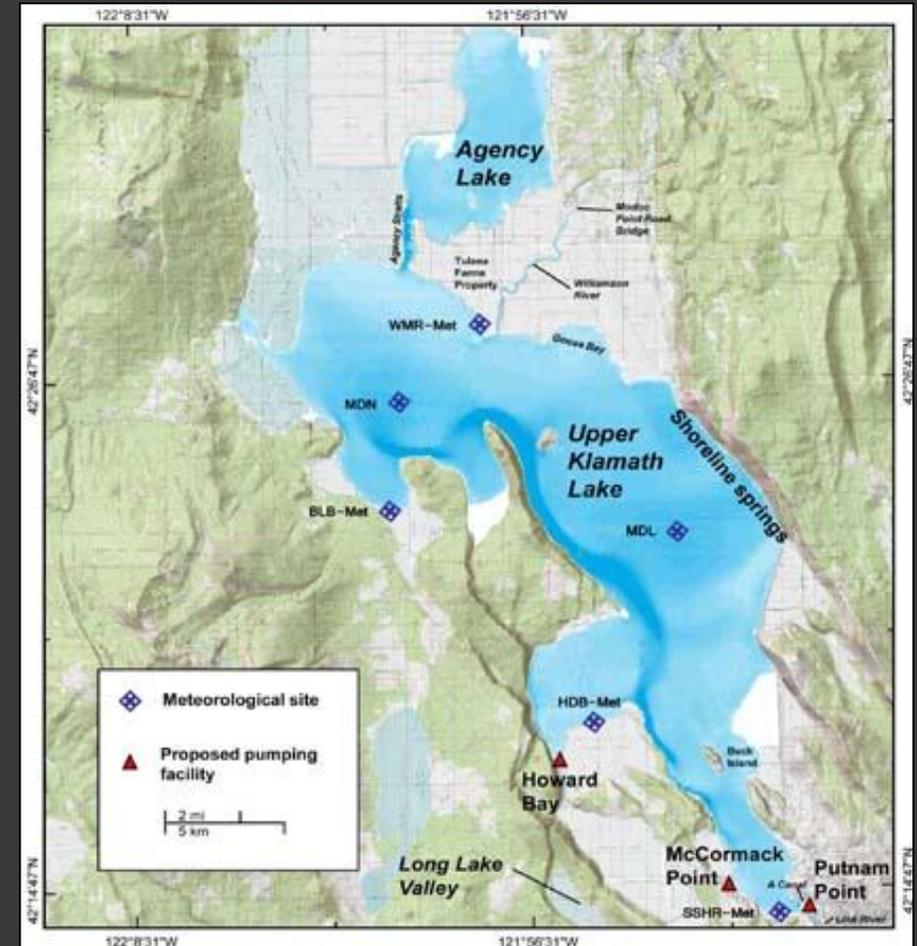

**As we age our immune system weakens and our ability to absorb nutrients through our gastrointestinal tract reduces.**

**This supplement is specifically designed to combat these challenges**

# Contains the highest grade of natural and pure ingredients

Anizomenon-flos-aquae (AFA) and Chlorella are harvested from the wild in its 100% organic natural state, comes to you directly from southern Oregon's extraordinary Upper Klamath Lake

**Located at 4100 feet in elevation, the lake is far removed from any large cities that might pollute the air and water, and is entirely surrounded by the Cascade Mountains**

**This unique ecosystem of mineral-rich water, clean air and high intensity sunlight makes Upper Klamath Lake the perfect ecosystem for this nutrient-dense whole food. After harvesting these are then quickly freeze-dried to preserve its nutritional profile and enzymatic activity.**

**KEVA**

# **Need of Keva Stem Cell Plus**

**Today's food supply is highly refined, processed, genetically altered and nutrient deficient. All of these factors negatively affect our bodies over time**

**Over production of our farmlands depleted the soils, causing our foods to be nutrient deficient**

**Contains 100% wild algae harvested at the peak of its bloom in summer, and then quickly freeze-dried to preserve its nutritional profile and enzymatic activity**

**The nutrients found in AFA and Chlorella are perfectly combined by nature, and work so synergistically, that Keva Stem Cell Plus delivers a wide range of nutritional health benefits for the regular user**
