

WHAT IS DEWORMING IN ANIMALS?

- **Deworming** means removing worms from the digestive system, particularly from the stomach, intestine and liver.
 - **Deworming** makes the **animal** more resistant to diseases.
- It helps the **animal** grow faster, perform better and produce better milk

SYMPTOMS OF WORM INFESTATION IN ANIMALS

- Animal lacks vigor
- It has a poor appetite
- Its body weight decreases
- It shows diarrhea with mucus, blood or worms
- It eats soil or other organic matters
- It has rough hair coat
- It has anemia

COMMON INTERNAL PARASITES

ROUNDWORMS/ASCARIS:

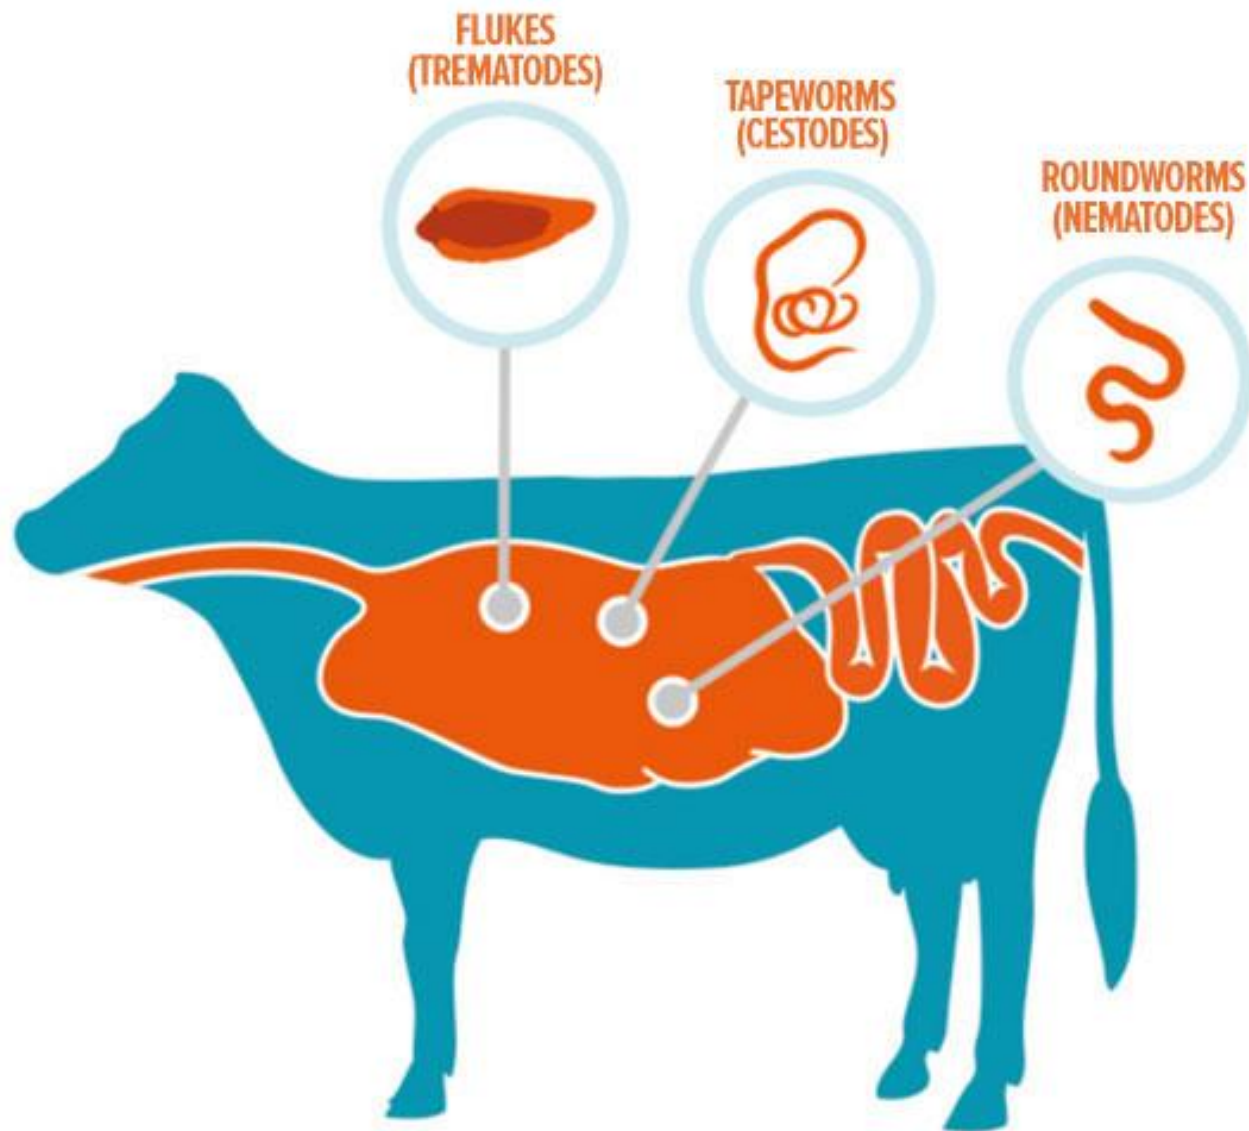

Affect ruminants (cattle, water buffaloes, goats), pigs and poultry.

TAPEWORMS:

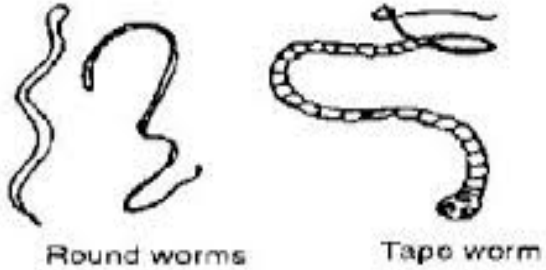

Affect ruminants, pigs and chicken.

LEAF-SHAPED WORMS (LIVER FLUKES):

Affect ruminants.

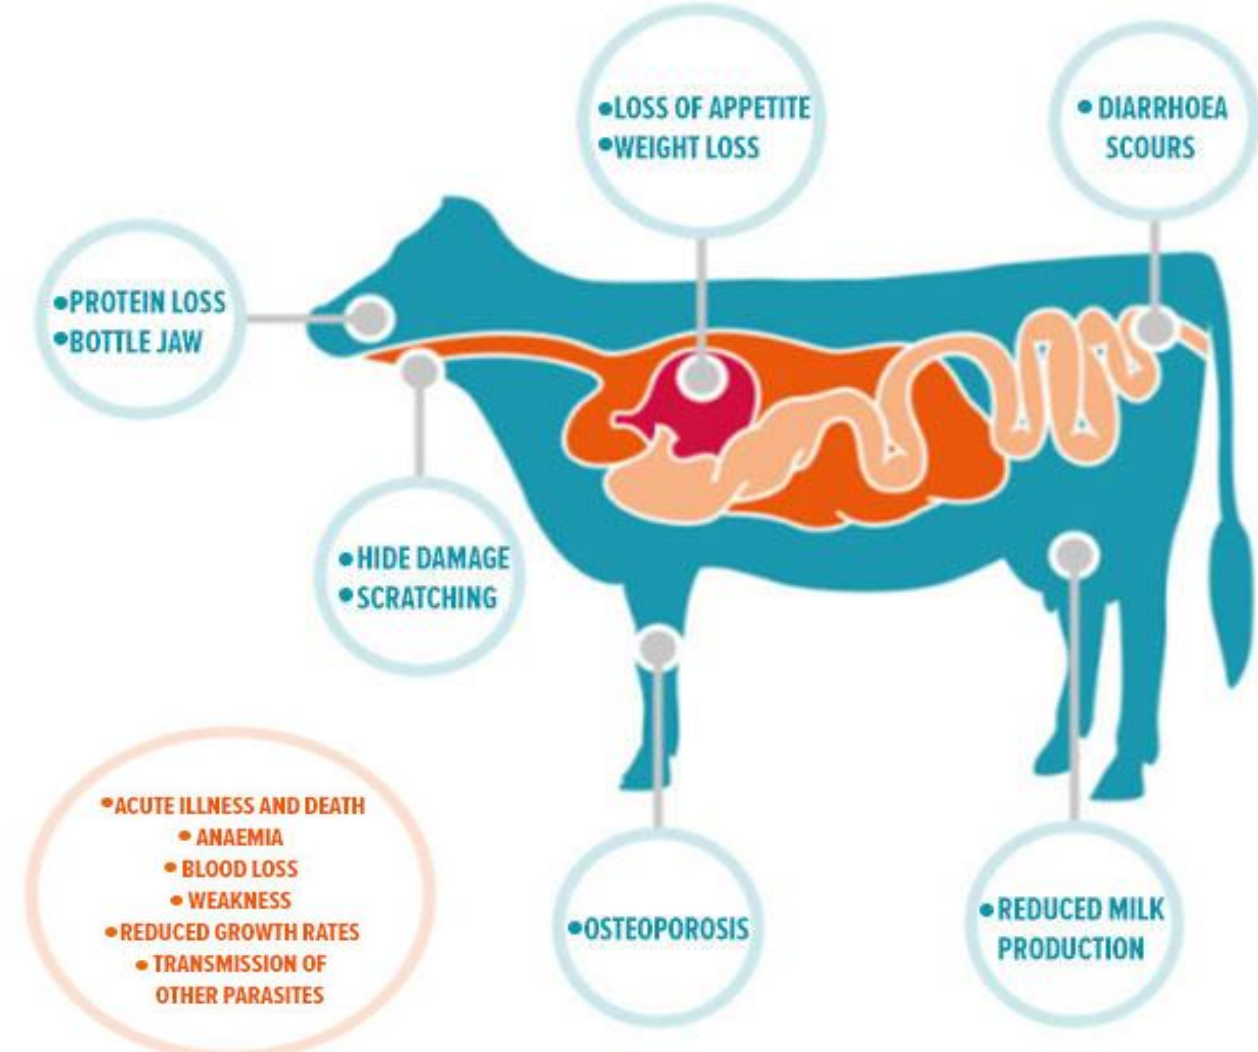

WHY DEWORMING IN ANIMALS?

Internal parasite groups (like **Roundworms, Tapeworms, Fluke worms**) can cause many health problems

1. Roundworms & Tapeworms can cause:

- Depressed weight gains
- Poor feed efficiency
- Reduced milk production and reproductive inefficiency in cows

WHY DEWORMING IN ANIMALS?

2. **Liver fluke** on the other hand causes liver damage to such an extent, that it:
- Deprives the animal of energy and protein (loss of condition, fertility, and growth)
 - Limits the storage ability of trace minerals, which makes supplementation with trace minerals ineffective and leads to suboptimal trace-mineral levels (impaired immunity, reproduction, and production)
 - Leads to a vitamin-A shortage, even on green pastures.

EACH UNCOATED BOLUS CONTAINS THE FOLLOWING INGREDIENTS-

**VIDANGA-
150MG**

RASNA- 150GM

KUTAJA- 150GM

PATHA- 150MG

**VATSAKA-
150MG**

**GHRITHKUMARI-
150MG**

**AMALAKI-
150MG**

**PIPPALI MULA-
150MG**

**PRIYANGU-
30MG**

**KACANARA-
30MG**

LODHRA- 30MG

SUNITHI- 120MG

MARICA- 120MG

PIPPALI- 120MG

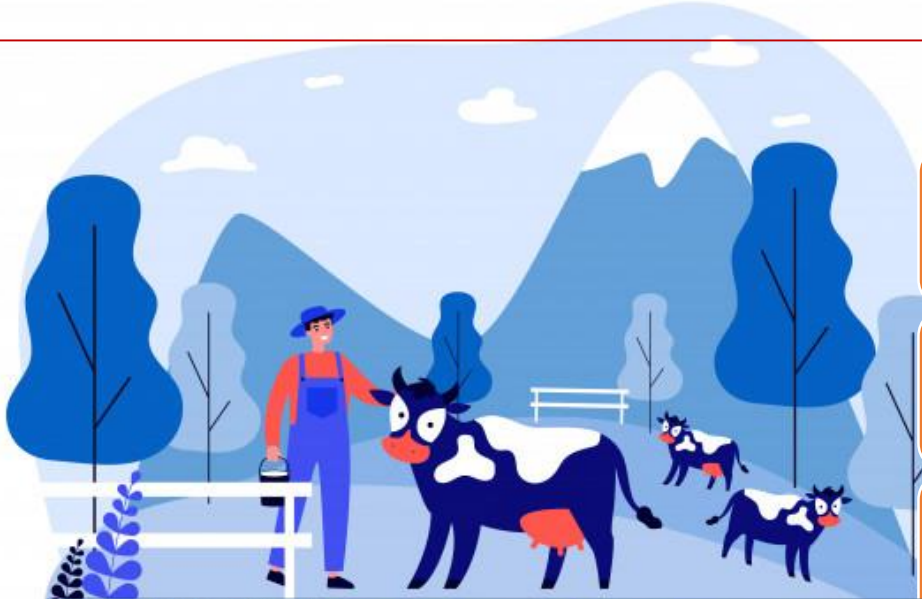

TVAK- 600MG

ELA- 600MG

**TEJAPATRA-
600MG**

ASAVA BASE

BENEFITS OF KEVA DEWORM VETERINARY BOLUS

Made from Herbal formulation so does not cause any harm to the animals

It can kill various worms effectively

Does not destroy ruminal microflora

Expels the worms & improves fertility

Safe for pregnant and lactating animals

Maintain intestinal pH for maximum absorption of Calcium & Phosphorous

DOSAGE

For Sheep/ Horse/ Goat/ Pig/ Cattle

Small Animals- 1 Bolus per month Orally

Large Animals- 2 Bolus per month Orally
