ALKALINE  
SS WATER  
BOTTLE

# WHAT IS ALKALINE WATER?

Alkaline water has a higher pH level than regular drinking water. Because of this, some advocates of alkaline water believe it can neutralize the acid in your body

Normal drinking water generally has a neutral pH of 7. Alkaline water typically has a pH of 8 or 9

However, pH alone isn't enough to impart substantial alkalinity to water. Alkaline water must also contain alkaline minerals and negative oxidation reduction potential (ORP)

ORP is the ability of water to act as a pro- or antioxidant. The more negative the ORP value, the more anti-oxidizing it is

# FEATURES & DETAILS OF ALKALINE WATER

Removes acid waste from blood as a result helps in weight loss

Detox the Body and removes heavy metals

Helps in better hydration

Act as an Anti aging and provides healthy skin and younger look

Helps in better Digestion

Provides calcium which helps in stronger binder between muscles and joints and relives from pain

Provide energy to our body

Prevents from Heart disease

# THE BASICS ORP

**ORP: OXIDATION REDUCTION POTENTIAL** - If a substance has a positive ORP it is considered an oxidizer. The higher the ORP the more it damages cells and increases the aging process. Liquids with a negative ORP are considered anti-oxidants and can slow the aging process

Drinking water should have a negative ORP measurement.

The value of ORP quantifies the amount of energy in water by numbering electrons.

ORP values are expressed as millivolts, or mV.

Drinking water should have a negative mV number of at least -50mV or more.

Water with an ORP of -50mV will have enough negative ions to attract and neutralize excess acids

# **INTRODUCING ALKALINE STAINLESS STEEL WATER BOTTLE**

## **WITH COPPER BENEFITS & INSTANT ALKALINE & NEGATIVE ORP**

We are using the world's most advanced technology to manufacture our product. We have taken initiative of 'Make in India' Campaign and which boasts the high end technology from all over the world to manufacture our product

***Material*** - Stainless Steel Body + 99.99% Copper Infuser inside.

# FEATURES OF STEEL BODY

Very High Durability

Easy Cleaning and Maintenance and remains same as new for many years

The taste of your Alkaline water will remain unchanged as steel is very known 0 % Non Reactive Metal.

No Dangerous Toxins

Due to opaque (Non transparent) body, sunlight and other natural or man-made environment will not effect the quality of Alkaline Water

In winter or cold weather when we will use room heater to warm the room, you will also be able to put your alkaline steel bottle in front of your room heater or blower for Luke warm water (saves electricity & LPG Gas) as body is made of Steel & will not melt

# FEATURES & DETAILS OF COPPER

Copper helps in preventing cancer

Copper helps in regulating women's healthy menstrual periods

Copper helps in regulating obesity

Copper helps in regulating thyroid glands

Copper helps in maintaining digestive health

Copper has Anti-bacterial property

# Features & details of Alkaline Water

Removes acid waste from blood as a result helps in weight loss

Detox the Body and removes heavy metals

Helps in better hydration

Act as an Anti aging and provides healthy skin and younger look

Helps in better Digestion.

Provides calcium which helps in stronger binder between muscles and joints and relieves from pain

Provide energy to our body

Prevents from Heart disease

# How to recharge copper Mineral Cartridge once in a week?

Fill your SS Alkaline bottle with drinking water and squeeze two lemons or 2 teaspoon vinegar (sirka) in water and close the lid

After 30 Minutes shake the bottle and drain the water and again clean your bottle for 2-3 times with normal drinking water and let copper cartridge to dry for 4-5 hours

This method will help to clean Alkaline mineral inside the cartridge

# DEMO 1

## WITH PH TESTER

Take small amount of normal water or RO water in a Glass 1. Put some Alkaline water in Glass 2

### Step 1

Add few drops of pH tester in Glass 1. If water turns yellowish then it clearly shows that the water we drink is acidic and is harmful for our body

### Step 2

Similarly, put few drops of pH tester in Glass 2, it will turn into Blue colour which proves that the water is Alkaline with a pH of 7.5-9.5

Glass 1-  
Normal water

Glass 2-  
Alkaline water

# DEMO 2

## WITH ORP (OXIDATION REDUCTION POTENTIAL)

Take small amount of normal water or RO water in a Glass 1. Put some Alkaline water in Glass 2

### Step 1

Add few drops of ORP in Glass 1 and check. The colour of water will not change. However as per ORP chart, it should turn into Pinkish colour which means negative ORP

### Step 2

Similarly, put few drops of ORP in glass 2. The colour of water will change to pink which is again a proof that Alkaline water is healthy for our body

Glass 1-  
Normal water

Glass 2-  
Alkaline water

# DEMO 3

## WITH TURMERIC POWDER

Take small amount of normal water or RO water in a Glass 1. Put some Alkaline water in Glass 2

### Step 1

Add half spoon of Turmeric powder in Glass 1. It will not show any reaction and the powder will set below the surface of water

### Step 2

Similarly, put same quantity of Turmeric powder in Glass 2 and it can be clearly seen that the powder gets easily mixed in Alkaline water

Glass 1-  
Normal water

Glass 2-  
Alkaline water

# HOW TO USE?

Fill the bottle with drinking water up to lid so that copper infuser is dipped in water, use drinking water having Maximum 500 TDS as per BIS (bureau of Indian standard)

Leave for 10 minutes so that mineral is released and dissolved in water to make Alkaline with negative ORP benefits
