

Kaipo Neem Oil

With the uncountable benefits of powerful plants 'Neem'

Keva Industries has launched a new agricultural product naming 'Kaipo Neem Oil'

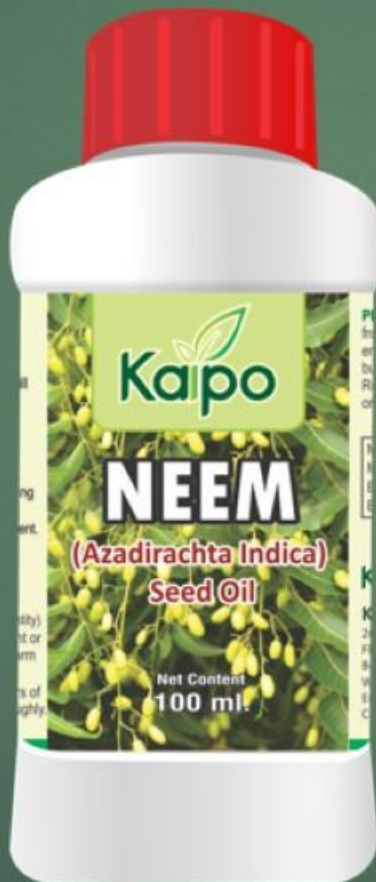

Kaipo Neem Oil

- ▶ Kaipo Neem Oil consists of 100% concentrated neem oil (*Azadirachta indica*) which is a natural byproduct of the neem tree.
- ▶ The oil is harvested from the trees' seeds and leaves.

IT'S ORGANIC AND BIODEGRADABLE

Neem oil is a natural derivative of the neem tree (*Azadirachta indica*), an evergreen variety native to India.

BIODEGRADABLE

ORGANIC

This makes it organic and biodegradable. It does not cause any adverse effect on environment.

Advantages of Kaipo Neem Oil

It is Natural/Organic, emulsifiable, Eco-friendly, bio degradable

It helps in maintaining environment health by reducing the level of pollution

Harmless to plants and maintain the stability of soil fertility.

Advantages of Kaipo Neem Oil

It also reduces human and animal hazard by reducing the level of residue in the product.

It reduces risk of plant failure and increase crop yield by 15-20%

Unlike chemical it saves environment without pollution.

Kaipo Neem Oil as Insecticide/ miticide

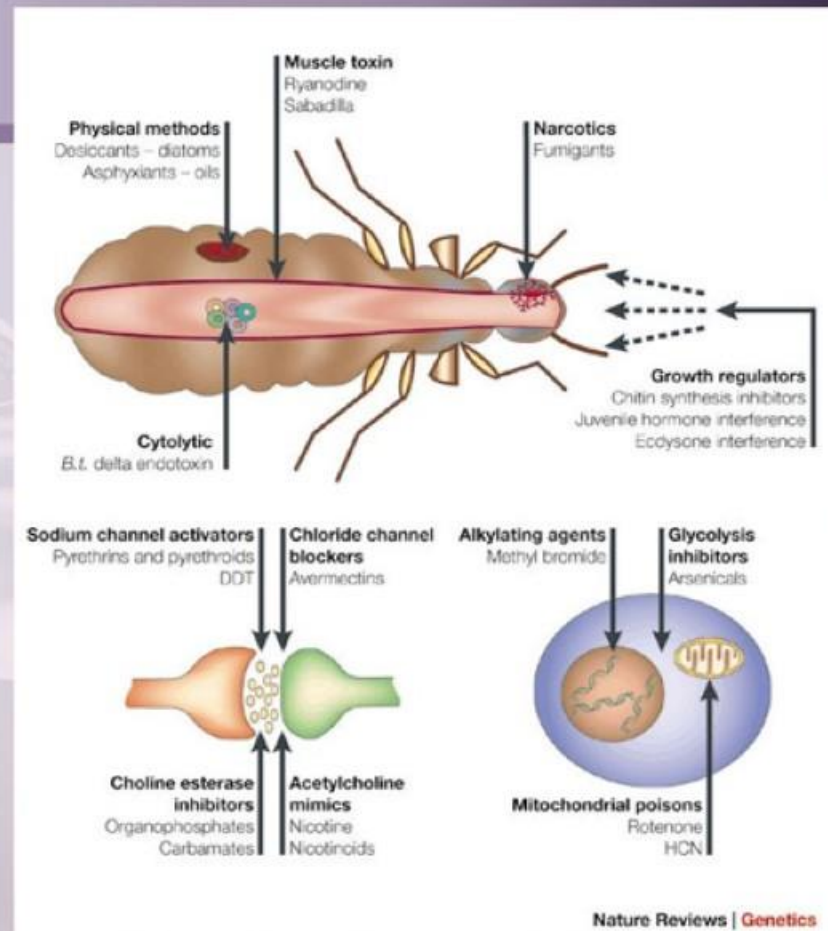

Neem oil is an effective Insecticide/ miticide that gets rid of over 200 species. Some of the most common include:
Aphids, Mites, Scale, Leaf hoppers, White flies, Caterpillars and Mites.

Beneficial Insects Are Unaffected

► Besides being an organic insecticide, using this product allows you to target pests specifically as opposed to beneficial insects such as bees and lady beetles.

► By definition, "pests" are the insects eating your plants, and neem oil, when properly applied, kills an insect only if it ingests the sprayed foliage (bees and lady beetles do not eat plant leaves).

Kaipo Neem Oil as Fungicide

- ▶ Kaipo neem oil can be used to prevent or even kill fungus on plants.
- ▶ Use neem oil for powdery mildew and other common fungal diseases, including: Black spot, Scab, Rust, Leaf spot, Anthracnose, and Tip blight.
- ▶ To prevent fungi, spray susceptible plants every seven to 14 days until the fungus is no longer a threat.
- ▶ To kill fungi, spray plants once a week until the fungi clears up, and then spray every two weeks to keep it from coming back.

How Kaipo Neem Oil Works

- ▶ Kaipo Neem Oil disrupts insects' hormonal balance so they die before they molt to the next life stage.
- ▶ Kaipo Neem Oil is made of many components, Azadirachtin is the most active. It reduces insect feeding and acts as a repellent.
- ▶ It also interferes with insect hormone systems, making it harder for insects to grow and lay eggs.
- ▶ Azadirachtin acts in the following ways: It deters certain insects, such as locusts, from feeding and it interferes with the normal life cycle of insects, including feeding, molting, mating, and egg-laying.

How to Apply Kaipo Neem Oil

Take 5-10ml of Kaipo neem oil (or required quantity) and add in 10-20 ml of strong liquid detergent or Keva Agro 80 plus liters of water. Mix the solution thoroughly in 10 -20 litres of water.

Spray on all plant surfaces (including undersides of leaves) until completely wet..

Use Kaipo Neem Oil with Keva Agro 80 plus

Benefit of using Kaipo Neem Oil with Keva Agro 80 plus:

- ▶ Keva Agro-80 is a spreader and will spread the Kaipo neem oil all over the plant and thus will increase the efficiency and power of the product.
- ▶ Best suggested to be used with Agro-80.

To Be Kept In Mind

When applied as a preventative, Neem oil should be applied on a 7- to 14-day schedule.

To control a pest or disease already present, it is recommend an application on a 7-day schedule.
