AGRO-

80 PLUS

CONCENTRATED- 80% Active Ingredients

- **SPREADER - Provides more uniform spray deposit on plants- Improves coverage of herbicides, insecticides, fungicides, defoliators and foliar fertilizer sprays**
- **ACTIVATOR – Helps improve performance of post-emergent herbicides, insecticides and fungicides, foliar fertilizers and defoliators.**
 - **FOR USE ON GROWING AND HARVESTED CROPS**
 - **HELPS IN DISPERSING POWDERS**
- **HELPS KEEP SPRAY EQUIPMENT CLEAN AND PREVENT CLOGGED NOZZLES**
 - **NON-CORROSIVE TO EQUIPMENT**
 - **BIODEGRADABLE**

How Keva Agro 80 Plus improves performance of pesticides ??

Mixing Keva Agro 80 Plus with the pesticide solution reduces the surface tension and prevents beading of droplets, thus enabling uniform coverage of the pesticide and ultimately, resulting in a better crop yield

KEVA

Use with insecticide, fungicides, foliar fertilizers and defoliators

- Prepare a solution by following the mixing instructions recommended by the pesticide/ defoliators and insecticides, fertilizer/ foliar fertilizer manufacturer
- Mix 5 ml of product (¼ capful) per 15 liters of pesticide or foliar fertilizer solution. Spray normally on the crop

Use With Post – Emergent Herbicides

- Make a solution of post- emergent herbicide to be used with water by following the instruction recommended by the manufacturer.
- Then mix 20 ml. Keva Agro 80 Plus (1 capful) per 15 liters of post emergent herbicide solution. Spray normally on the crop

Use At the time of Irrigation

- Mix 160 ml of product in at least 80 liters of water for every acre of land you want to irrigate
- Spray this mix on the land you want to irrigate at least 12 hrs in advance before irrigating it
- Single 1 Ltr bottle of Keva Agro 80 Plus will be ample to irrigate more than 4 to 5 acres of land.

KEVA

**KEVA
AGRO
BOOSTER**

Keva Agro Booster contains Potassium Humate which will help to improve soil fertility, It can increase the growth of beneficial bacteria and arrest in fungal growth

**With Organic
Manure
Granules**

KEVA

KEVA

Directions for use

- **Mix 500 gm of Keva Agro Booster in adequate quality of mud/cow dung and spread it in 1 acre**
- **For chemical fertilizer add 1 Kg of Keva Agro Booster in 1 acre land**

KEVA

KEVA
AGRO
ENZYME

Agricultural enzymes present in Keva Agro Enzyme are the catalyst that accelerates the chemical reaction that unblocks the nutrients present in the soil and makes it available to plant roots

KEVA

Directions to use

- Shake the bottle well before opening
- Mix desired quantity of Keva Agro enzyme in small quantity of water and stir well
- Add the solution to sufficient quantity of water to achieve required coverage
- Keva Agro Enzyme can be mixed with most of the pesticides after diluting with water separately

Dosage and Application-
30-35ml per 15 litre of water

KEVA

KEVA
FLOWER
BOON

KEVA

**A powerful
formula to increase
flower and fruit
crop**

**Containing naturally
available vegetable
protein**

**With Nitro benzene
35%**

It increases the flowering of plants which means increased flower crop

Increased flowering would result in increased fruiting, which again means a better crop in agriculture

This enables crops to accelerate growth and reduces the deficiency of protein in the crop

Directions to use

1 to 1.5 ml per liter of water for foliar application

Mix 2 ml of Keva Flower Boon in 1 liter of water and spray it on crops

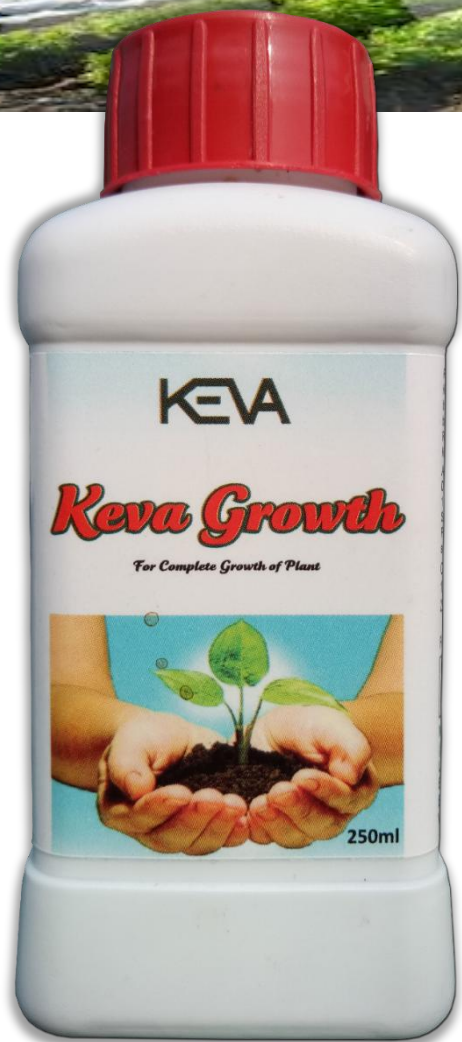

It is compatible with pesticide & fungicides

It has wetting quality also

It helps the crops like cotton, Chillies, bringal & tomato

KEVA

KEVA
GROWTH

**Enriched with Seaweeds extract it is designed
for Complete Growth of Plants**

➤ Keva Growth rectifies the disturbed metabolism of crops due to excessive use of chemical fertilizers, resulting into phenomenal increase in absorption and use of nutrients by the plant.

Directions for use

- **Drip Irrigation:** 1 litre of Keva Growth in one acre
- **Spraying method:** Mix 2 ml of Keva Growth in 1 litre of water
- **For Grapes:** Mix 1 ml of Keva Growth in 1 litre water for spraying or dripping
- **It can be mixed in all kind of chemicals except herbicide**

KEVA

KEVA ORGANIC MICRONUTRIENTS

Contains all the vital components essential for a plant to grow healthy. These nutrients not only improves the plant's growth but also stabilizes the plant during drought and diseases. It provides the balanced nutrition to the plants and enhances the flowering and fruiting ability.

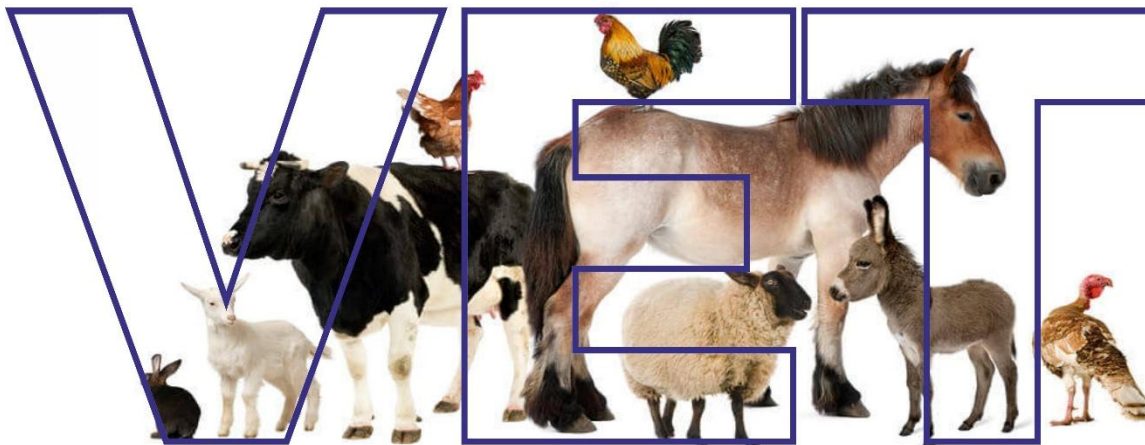

APPLICATION

Drip irrigation,
Flood irrigation

For Spraying- 500ml for
per 1 Acre
Otherwise- 1 Litre for
per 1 Acre

KEVA

KEVA ANIMAL LIVER TONIC

Keva Animal Liver Tonic protects the liver of animal from all types of toxins

Many types of toxins enter the body of the animal by eating of fodder or something else

KEVA

It also protects the animal against any type of stress

After de-worming, this liver tonic quickly fixes the animal's liver

KEVA

Dosage

Large animal- 100ml per day

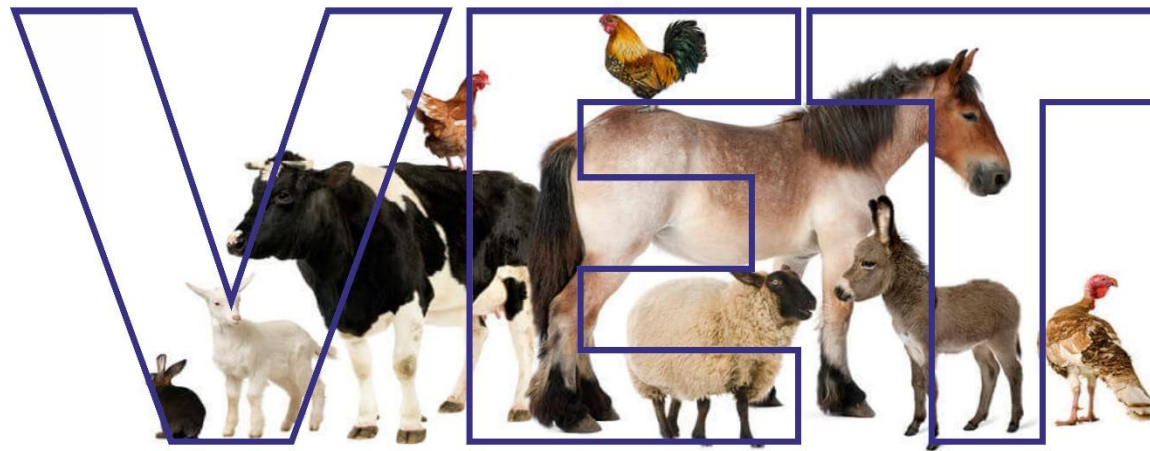

**Small animal-
50ml per day**

**Or as recommended
by veterinarian or
nutritionist**

KEVA

KEVA UTERINE TONIC

STRENGTHENS THE UTERUS OF ANIMALS

Helps in relieving the problems of uterus in animals

Brings the animal's uterus to its correct position at the right time

Increases ability to conceive by reducing oxidative stress in animals

Also enhances the ability of milk in animals

Provides strength to the animal during pregnancy

Improves uterine tube contraction for better sperm ejaculation

Helps to produce the correct hormonal level to maintain pregnancy

Reduces the problem of frequent miscarriages

DOSAGE

**Large animal - 200 ml after giving birth and 200 ml after 6 hours
and then 2 times daily for 3 days**

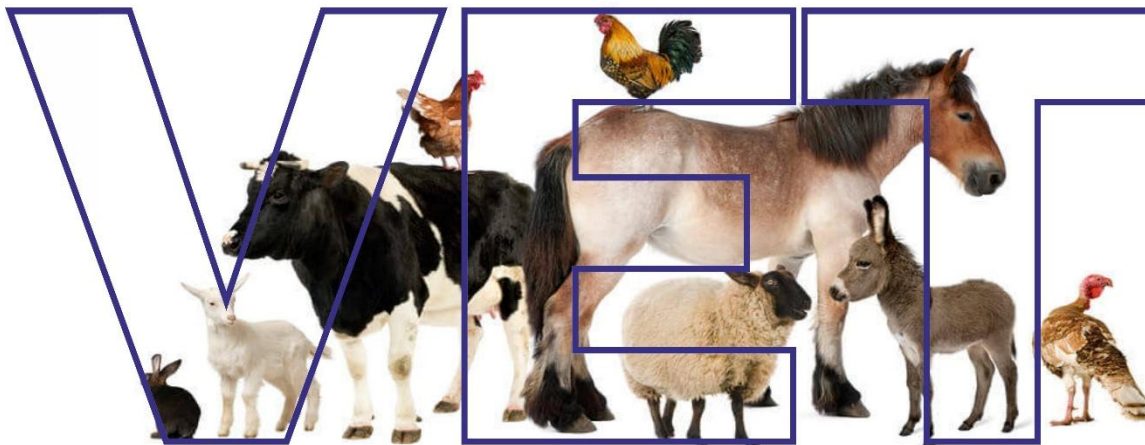

**Small animal - 100 ml after giving birth
and 100 ml after 6 hours**

For regular use - 100 ml daily.

KEVA

KEVA ANIMAL CALCIUM

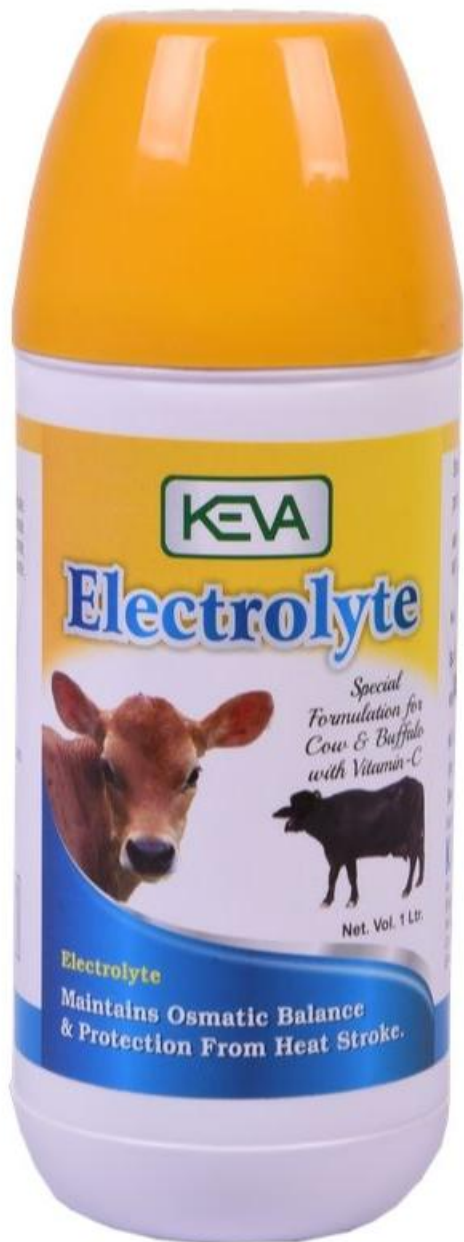

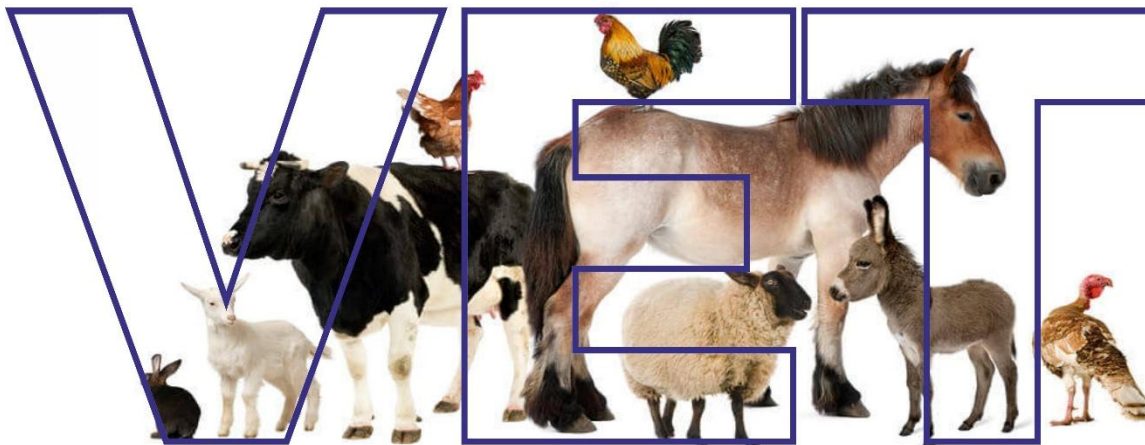

**Provides complete
nutrition to the cattle**

**Keva Animal Calcium contains Calcium
along with Phosphorous, Vitamin D &
Vitamin B12 for dairy animals' health &
to support their nutritional needs.**

Directions for use

Give the cattle 50ml Daily

KEVA

KEVA
ELECTROLYTE

KEVA ELECTROLYTES ARE CHEMICAL ELEMENTS OR MINERALS THAT FORM IONS IN BODY FLUIDS. THEY ARE CRITICAL FOR THE NORMAL FUNCTION OF ALL CELLS IN THE BODY.

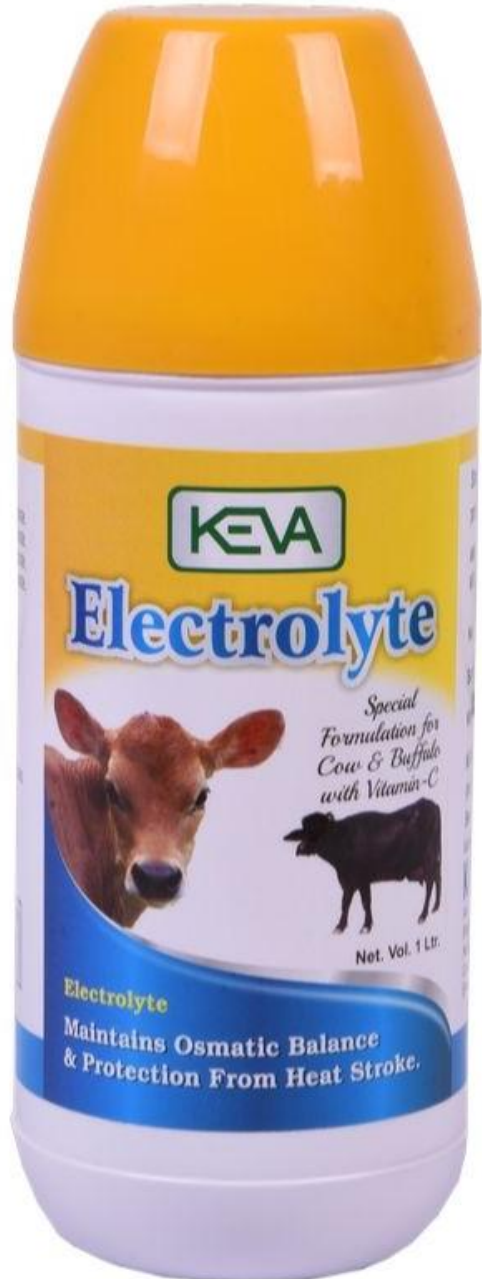

Keeping electrolytes balanced within your pet's body is important for maintaining the proper amount of water in the body.

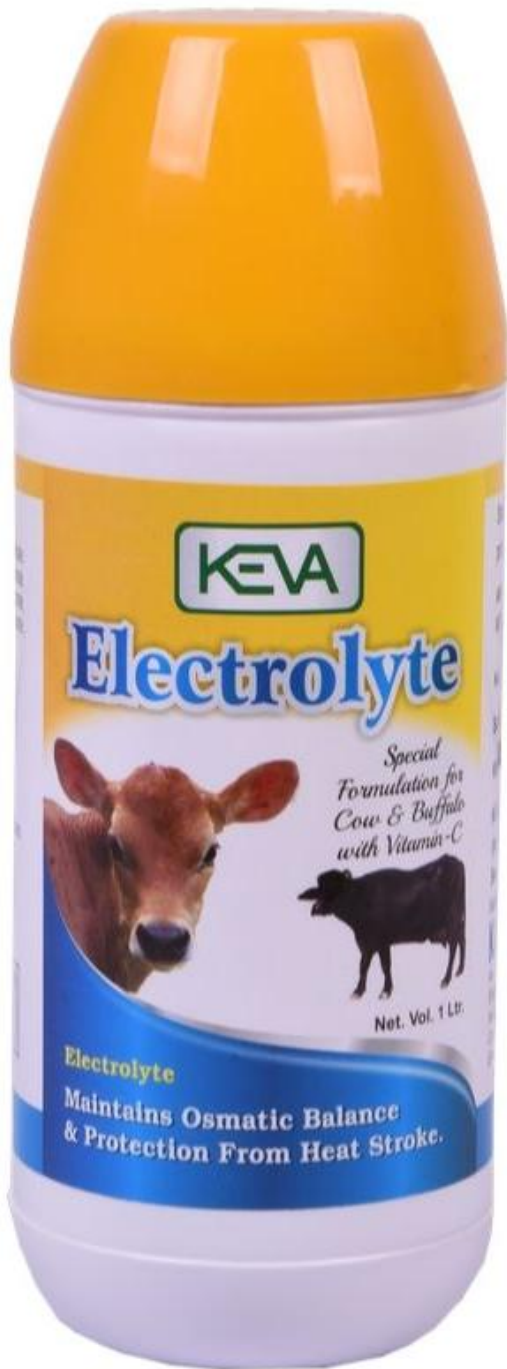

Electrolytes are also important for regulating nerve and muscle function, balancing blood acidity, and allowing important bodily processes to occur.

When the body doesn't receive adequate hydration, it responds by drawing fluid out of cells.

This results in a loss of electrolytes, such as sodium, calcium, magnesium, and potassium.

Because electrolytes are critical for the normal function of all cells in the body, an imbalance of essential electrolytes can disrupt the function of the body's organs and systems.

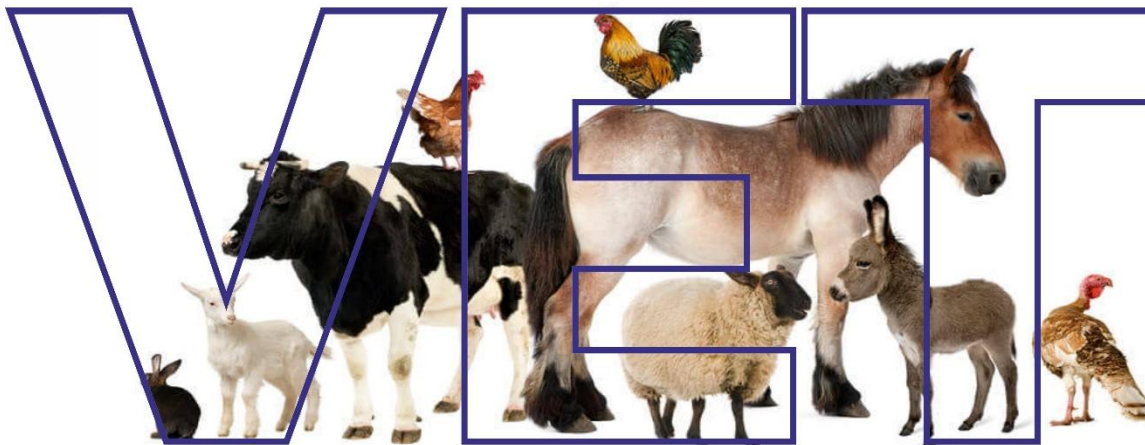

HOW TO USE?

Cow/Bufaloes/Horses: 100ml
Per day. Calve/Sheep/ Goats:
10ml per day has to be added
into feed or drink water.

KEVA

**KEVA MILK
ENHANCER**

KEVA Milk Enhancer is an essential herbal milk enhancer supplement that helps in enhancing milk production in animals. It is composed of Bypass fat, Calcium, Herbal Galactogue for better milk production. It is a unique combination of chelated calcium-fortified with vitamin D3 for better milk production along with better health and growth.

Improves Feed Efficiency.

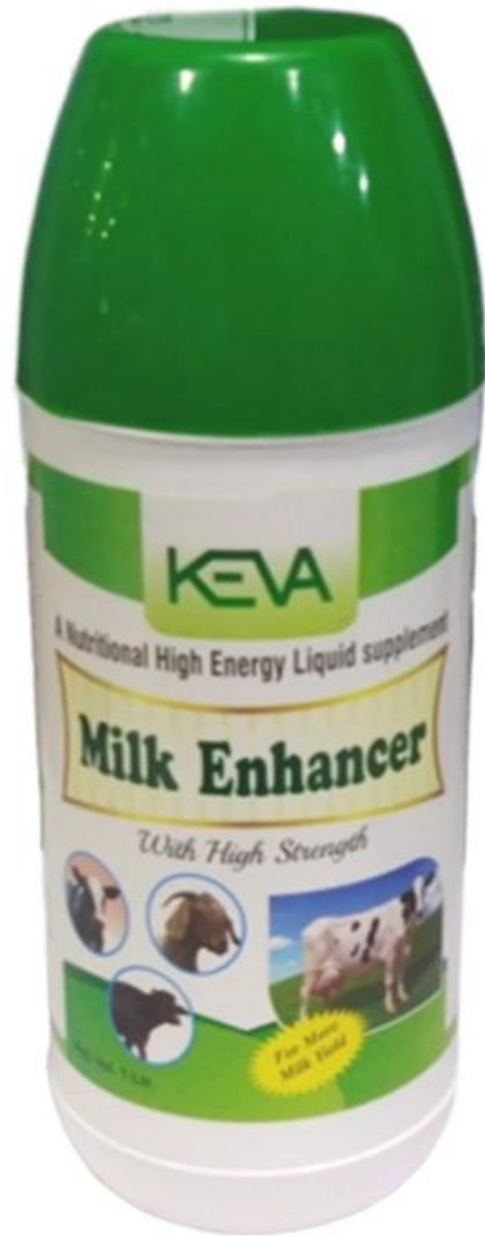

Improves Flock and production uniformity.

Improves litter quality.

Improves dietary content.

Enhance milk production in early lactating animals.

Fulfils the nutrients requirement of the body for better milk production.

HOW TO USE?

Cattle 100ml per day or as directed by Nutritionist.
