 - **Fruits are not growing in size**
 - **Succumbs to pests**

KEVA

Then you can treat the crop by sprinkling Keva Growth. Vital changes start within 24 hours of sprinkling and they are clearly visible within 8 days

KEVA

Contains-
Seaweed extract powder 15%
Aqueous q.s 85%

KEVA

Benefits after regular application

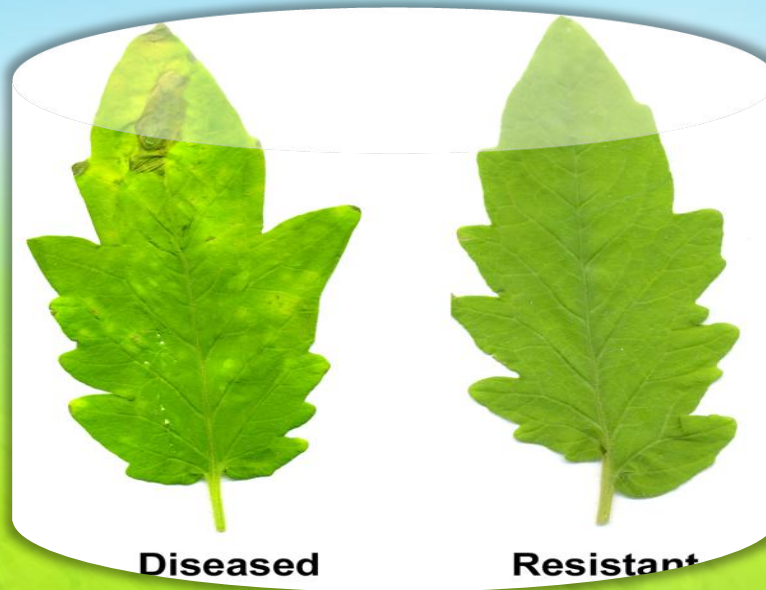

➤ Leaves become deep green in color, doubling photosynthesis

➤ Leaves double in size, as more nutrients are generated with the help of solar energy

➤ The crops become stronger and more resistant to pests and diseases

➤ The plants with lesser number of flowers bloom well

➤ Sometimes what is wrong with the crop cannot be properly diagnosed, nothing seems to work. Keva Growth helps in such a situation and rescues the crop from all kind of diseases

➤ **Keva Growth rectifies the disturbed metabolism of crops due to excessive use of chemical fertilizers, resulting into phenomenal increase in absorption and use of nutrients by the plant.**

KEVA
